Congrats Patty!

And just a minor correction. Dick Richards's call sign is KB5SIW, and
if Susan was using the radio then he was the control operator with
her using his call. I heard Dick, Jerry and Blaine at various times
during the mission in voice, but I don't think they heard me.

I did make it quite clear to Dick Richards that I wanted him to hear
my call sign from orbit before they landed. Maybe that's why they
diverted their landing to 3000 miles away from me? ;)

To: ham-space@ucsd.edu

Are there any ham-balloon folks on the net? If so, do you have upcoming
launches scheduled? Is there a central registry for this kind of
information? Thank you.

PS-The October 94 QST has a remarkable photo (page 102) of a balloon
bursting at high altitude.

To: ham-space@ucsd.edu

I am wondering if any of the transmissions received by the SETI project are
available for on-line downloading and analysis by amateur astronomers or
radio enthusiasts. Anyone aware of this possibility? Thanks.

To: ham-space@ucsd.edu

I was just wondering if there is a sat tracking program for the Amiga
computer? I have the A4000 and A2000. Mainl, I will be tracking the
SATs with the A2000. Any info would help.

Thanks,
